

NOMINATIONS SOUGHT

**GUSTAVUS JOHN ESSELEN AWARD
FOR
CHEMISTRY IN THE PUBLIC INTEREST**

The Esselen Award for Chemistry in the public interest is a very prestigious honor provided by the Northeastern Section of the American Chemical Society. The award annually recognizes a chemist whose scientific and technical work has contributed to the public well-being, and has thereby communicated positive values of the chemical profession. The Awardee should be a living resident of the United States or Canada at the time of nomination, and the significance of this work should have become apparent within the five years preceding nomination.

The Esselen Award has no limitations with respect to the chemical field in which the nominees are active. It differs from many other awards in that it is for chemical activities whose importance to the public has been demonstrated. A list of the most recent awardees appears on the back of this notice; a complete list is available at http://www.nesacs.org/awards/esselen/awards_esselen_recipients.html.

THE AWARD CONSISTS OF A MEDAL AND A CHECK FOR \$5,000. Travel expenses incidental to the conferring of this award will be reimbursed. The award is usually presented at the April meeting of the Northeastern Section in Cambridge, Massachusetts. The Awardee will deliver an address on the subject of the work for which the honor is being conferred, or for work in progress which is also directed to chemistry in the public interest. The award address should be at a level where it would be of interest to an audience that does not have knowledge of the specific field.

Nominations shall include: 1) a letter signed by the primary sponsor with a description of the nominee's work recognized as making a major contribution to the public welfare and as communicating positive values of the chemical profession, plus the names of two co-sponsors; 2) short supporting co-sponsor statements; 3) the nominee's professional biography including a list of no more than ten of the nominee's publications selected for their pertinence to the work nominated for recognition; and 4) copies of popular and technical press news or feature articles indicative of public benefit and interest. Inquiries should be directed to Dr. John Macor, c/o Jeananne Piper Grady, 11 Thaxter Street, Hingham, MA 02043. All nomination material must be consolidated into a single electronic pdf file and emailed to john.macor@sionnatx.com with a copy to jpipergrady@gmail.com. The due date is Oct. 13, 2023. Joint nominations are acceptable. The Committee will review the nominations and the award recipient will be notified by the first of February.

PAST AWARDEES AND TITLES OF AWARD ADDRESSES

- 1995: **Howard J. Schaeffer**, Burroughs Wellcome Company. *The Discovery of Acyclovir (Zovirax®)*.
- 1996: **Roy G. Gordon**, Harvard University. *Low Emissivity Glass; Energy Conserving Windows*.
- 1997: **Rangaswamy Srinivasan**, UVTech Associates. *The Widely Used Laser Methodology of Tiny Focused Ablative Photodecomposition*.
- 1998: **Kyriacos C. Nicolaou**, Scripps Research Institute. *Chemical Synthesis and Chemical Biology of Natural Substances*.
- 1999: **Robert S. Langer**, Massachusetts Institute of Technology. *Development of Unique Polymers for Medical Applications*.
- 2000: **William A. Pryor**, Louisiana State University. *Vitamin E and the Prevention of Heart Disease*.
- 2001: **Joseph M. DeSimone**, University of North Carolina and North Carolina State University. *Green Chemistry for Sustainable Economic Development*.
- 2002: **Ronald Breslow**, Columbia University. *Chemistry Lessons from Biology and vice versa*.
- 2003: **Bruce D. Roth**, Pfizer Global Research & Development. *The Discovery and Development of Lipitor®*.
- 2004: **James W. Jorgenson**, University of North Carolina. *The Magic of Capillaries in Chemical Separations and Analysis*.
- 2005: **Jean M. J. Fréchet**, University of California at Berkeley. *Functional Macromolecules: From Design and Synthesis to Applications*.
- 2006: **Richard D. DiMarchi**, University of Indiana. *Chemical Biotechnology as a Means to Optimal Protein Therapeutics*.
- 2007: **Michael A. Marletta**, University of California at Berkeley. *Nitric Oxide in Biology: From Discovery to Therapeutics*.
- 2008: **John A. Katzenellenbogen**, University of Illinois at Urbana-Champaign. *Estrogens and Estrogen Receptors in Health and Disease*.
- 2009: **Chad A. Mirkin**, Northwestern University. *Nanostructures in Chemistry, Biology and Medicine*.
- 2010: **Stephen L. Buchwald**, Massachusetts Institute of Technology. *Palladium- and Copper-Catalyzed Processes for the Synthesis of Pharmaceutically-Relevant Molecules*.
- 2011: **Arthur J. Nozik**, National Renewable Energy Laboratory. *Prospects and Novel Approaches for the Low Cost Power Conversion of Solar Photons to Electricity and Solar Fuels*.
- 2012: **Bruce Ganem**, Cornell University. *Lost (Sometimes) in Translation: Advancing Chemical Discoveries Beyond the Laboratory*.
- 2013: **Michael H. Gelb and František Tureček**, University of Washington. *The Chemistry of Next Generation Newborn Screening*.
- 2014: **David R. Walt**, Tufts University. *Microwell Arrays: From Genetic Analysis to Ultra-High Sensitivity Diagnostic*.
- 2015: **Eric N. Jacobsen**, Harvard University. *Catalysis: A Frontier at the Center of Chemistry*.
- 2016: **Timothy M. Swager**, Massachusetts Institute of Technology. *Chemical/Biological Sensing: Science and Real World Applications*.
- 2017: **Neil M. Donahue**, Carnegie Mellon University. *Atmospheric Ozonolysis: From Collisional Energy Transfer to Particle Physics and Everything in Between*.
- 2018: **Jennifer A. Doudna**, University of California, Berkeley. *Re-writing the Code of Life: The Impacts and Ethics of Genome Editing*.
- 2019: **Carolyn R. Bertozzi**, Stanford University. *Chemical Approaches to Problems in Global Health*.
- 2020: **Geoffrey W. Coates**, Cornell University. *In Pursuit of the Perfect Plastic*.
- 2022: **Philip S. Low**, Purdue University. *A New Generation of Targeted Therapies for Cancer, Autoimmune, and Infectious Diseases*.
- 2023: **Kimberly A. Prather**, Scripps Institution of Oceanography. *Tiny Critters, Huge Impacts: How Microbes Impact Climate and Health*.

THE GUSTAVUS JOHN ESSELEN AWARD FOR CHEMISTRY IN THE PUBLIC INTEREST

AWARDED BY THE
NORTHEASTERN SECTION
OF THE
AMERICAN CHEMICAL SOCIETY
